

## **PREFACE**

The Organizing Committee of the 9th European Congress on Molecular Spectroscopy has the pleasure of offering to the participants this volume with most of the invited lectures delivered at the meeting in Madrid during 10–15 September 1967. The Committee is very much indebted to the authors of these papers who so willingly consented to contribute to this volume.

The Organizing Committee wishes to take this last opportunity to express its gratitude to all those who took part in the meeting.

Madrid  
November 1967

J. MORCILLO  
Chairman of the Organizing Committee
